

CERTIFIED INSTALLER OF

Groeneveld-BEKA: Multi-line AC Automatic Lubrication Systems

**SIMPLE. EASY.
EFFECTIVE.**

Groeneveld-Beka has been helping businesses increase equipment uptime and performance since 1922. Customers quickly learn that these specialized lubrication systems can help increase efficiency, extend component life and boost profits.

Groeneveld-BEKA Multi-line AC products are modular, and operate nearly maintenance free. Our lubrication engineers apply extensive knowledge, specialized data and experience to meet customer needs. We offer custom-designed and engineered lubrication solutions designed to perform even in harsh environments.

INSTALLATION. A complete lubrication system in a single kit.

PRODUCTIVE. Continuous and complete lubrication helps increase uptime and extended interval time between scheduled maintenance.

EFFECTIVE. Designed to accurately distribute lubricant while vehicle is in use.

EFFICIENT. Controlled application reduces wasted lubricant.

SAFE. Technicians avoid the potential dangers of manual lubrication.

COMPLETE. Designed to lubricate all components, even in difficult-to-reach locations.

MULTI-LINE CHASSIS LUBRICATION POINTS

- King Pins
- Tie Rod Ends
- Drag Links
- Steering Gear

AC2 Pump - 2L Reservoir (1-24 points)

FEATURES

- 12VDC and 24VDC
- Alternative injectors for dispensing precise amounts of lubricant
- Virtually maintenance free
- Waterproof and corrosion resistant
- Multi-position timer with memory

GreenLube EP-0

Get the best out of your system. Specifically developed for chassis lubrication.

- Easy to pump, even at low temperatures
- Highly water-resistant
- Keeps its properties in the severest conditions
- Provides good protection against corrosion
- Boost the positive effects of autolube
- Extended Warranty

TECHNICAL SPECS

- NLGI Grade: 0
- Thickener Type: Lithium
- Base Fluid: Mineral oil
- Operating Temps: -22F to 266F

MAINTENANCE REPAIR KIT

with metal storage box, fittings, tubing and cutter

KIT#: NFS-85942SP006

Bin#: TBD
